Art Unit: 3728

1) Claims 1 and 2 remain allowable.

2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3) Claims 3-5 are finally rejected under 35 U.S.C. § 102(b) as being anticipated by Johnson (3,362,520). The dispenser of Johnson is provided with a first telescoping component at sleeve S or S', a second telescoping component at the neck 13 of the container 11. The combination constitutes a necked cup. The combination is collapsible from the configuration shown in Figure 4 to the configuration shown in Figure 1. The combination is telescoping since the sleeve is capable of movement along the axial dimension of the side wall and neck of the container, within the container, and away from the base. Additionally, there is provided a lid which is positioned over the circumference of the collapsible cup by being positioned over the neck 13 of the container 11. The container 11 includes a base, at container walls and bottom, which is joined to the neck/second telescoping component. Pills/tablets 21 are provided in the first telescoping component.

The first telescoping component may be considered to have a vented pocket attached thereto since the term "attached" is broad enough to mean a part thereof.

Said pocket may be said to be vented since it has openings at the top end and down the side thereof (see Figures 5 and 6).

Art Unit: 3728

Regarding the limitation wherein the second telescoping component is required to be between the first component and the base, which appears to be a limitation intended to refer to the cup when it is collapsed (although such is not a requirement of the limitation), this limitation does not distinguish over the subject matter of Johnson for the following reasons. The term "between" is broad enough to be taken at any orientation, not just vertically. If one considers a slanted orientation along the material of the container as the container is necked from the ellipsoid side wall to the neck 13, then the second component (the neck) is between the base (the ellipsoid side wall) and the first component (the sleeve S), especially as shown in Figure 4.

4) Applicant's arguments are moot in view of the new grounds of rejection necessitated by Applicant's amendment.

5) Applicant's amendment necessitated the new grounds of rejection.

Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R.

§ 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
